DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: the claim for priority needs to be updated to read –This application is a Divisional application of US Application Serial No. 10/081,703, filed February 21, 2002, now US Patent 6,802,362--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 11 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 11 recites the limitation "stamping step" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 12 recites the limitation "the collar portion" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3726

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 9-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Fujio (JP 02154992).

Fujio teaches a method for making a heat pipe assembly, comprising the steps of:

providing a heat pipe having an envelope **3**, the envelope **3** having two elongated flat sides and two curved portions connecting the flat sides, the elongated sides having a length that is substantially greater than a radius of curvature of the curved portions (see figure 11), forming a fin **5** having a hole therethrough **11** sized and shaped so as to accommodate the envelope **3**, and placing the fin **3** on the envelope **3**.

Regarding claim 10, a collar **15** is drawn.

Regarding claim 12, note the notches **41** in figure 7(B).

Regarding claim 15, note the hole **11b** or **11a** in figure 4.

Regarding claims 11, 13 and 14, Official Notice is taken in that it is well known to form openings or holes by stamping. Applicant should note that the holes **11a** in figure 4 could be considered notches.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
